All the Structural Repairs
have been made good, but
Painting to the extent of £15 still

Dear Sir,

In accordance with instructions received we enclose herewith the foregoing account of the approximate amount of stock in your premises on Monday the 24th April last the day of the disturbance.

As we have audited your accounts for the past 7 years we were in a position to estimate the sales for the period from the 18th Jan'y last which was the date of your last stock-taking, particulars of which are in our possession.

In arriving at the sales or turnover for the period we worked on the average sales for the past four years as shown by your audited accounts, and after taking credit for the goods which were transferred to your Christchurch Place establishment, we reduced the total amount by 26% to bring it down to cost price, this being the average percentage on the turnover for the past 4 years.

The account is also credited with the looted goods which were recovered and returned to you by the Police.

The amount stated as purchases since the 18th January last to the 22nd April (Easter Saturday) has been proved to our entire satisfaction by the several wholesale houses which you do business with.

The amount and value of Stock on hands on the day of the disturbance appears to be £1701-7-3½, to which has to be added 17/6 for window tickets, and £1-1-0, for account books (which had only been purchased immediately prior to the disturbance) making a total of £1703-5-9½.

The reason of our having to estimate the sales for the period is due to the fact of your books not been forthcoming, they having been stolen from the premises along with the entire stock.

Yours faithfully,

H. Holman & Co
